B HEALTH ATTESTATION

I, the undersigned veterinary official authorised thereto by the Director of Veterinary Services of the exporting country, certify that:

1. The animals described in section A:

1.1 Are of(name of country) origin

1.2 originate from an area which is not under veterinary restriction for any disease to which the species are susceptible. The animals were kept at the premises of origin since birth or at least for the last 6 months. During this period the animals to be exported did not come into contact with any animals of a lower status.

2. The animals were kept in quarantine for an minimum period of 21 days according to the conditions set out in annexes 1 to 3 during which time the animals were individually tested for FMD (serotypes as specified by DVS Namibia) antibodies with negative results. A copy of the serology was faxed to the Director of Veterinary Services in Namibia and written confirmation of permission to consign the animals was received.

3. Immediately prior to departure the animals were treated with (as applicable):(give name, route and dose)

3.1 Treatment for external parasites: (date)

Name of product	Active ingredient	Dosage Rate

3.2 Treatment for internal parasites with broad spectrum anthelmintic (date)

Name of product	Active ingredient	Dosage rate

3.3 In the case of blesbuck and hartebeest, the animals were treated with an agent registered for killing Oestridae larvae.

Name of product	Active ingredient	Dosage rate

4. The animals were **inspected on the day of loading** and found healthy and fit to travel. Animals were loaded onto clean trucks which were sealed under official veterinary supervision.
